Mr. Kiran Ramamurthy - Bangalore

International Advisory Committee

Dr. William Prentice - USA

Dr. Arnie Valedon - USA

Dr. David M. Shapiro - USA

Dr. Carlo Castoro - Italy

Mr. James R. Pavletich - USA

Welcome Message

Dear Colleagues,

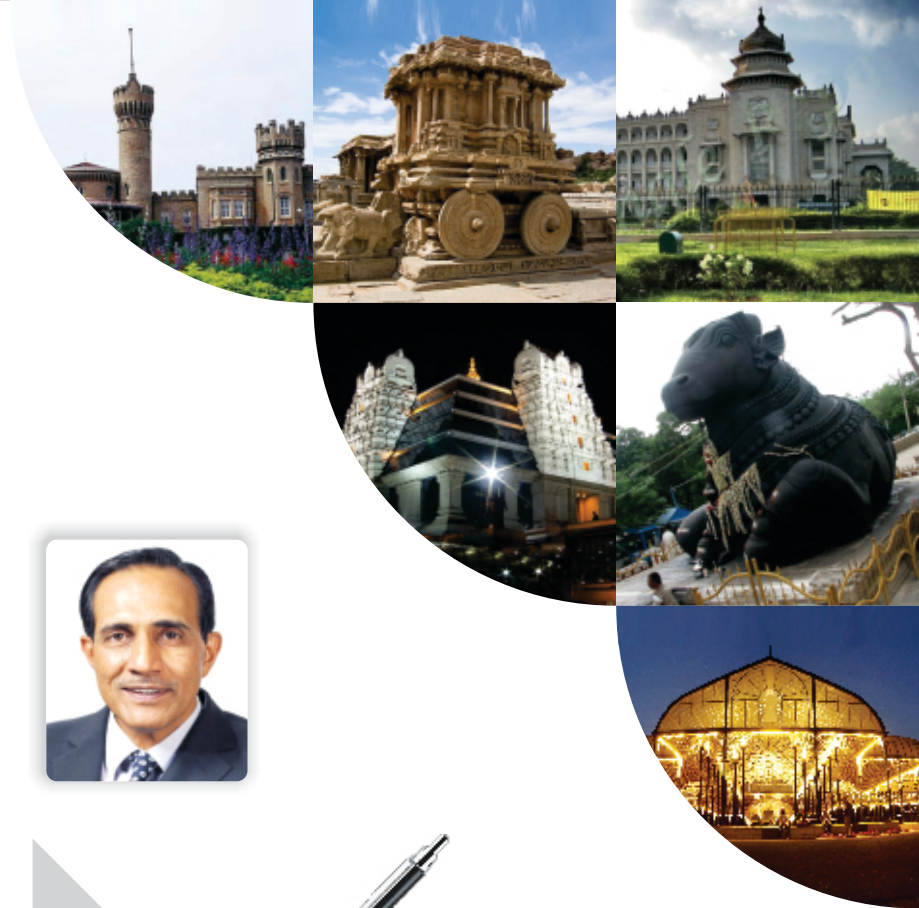

It gives us great pleasure to invite you for a conference on Ambulatory Surgery to be held on 2nd & 3rd September 2011 at Bangalore. The term 'Ambulatory Surgery' is not new. However, this concept has now changed the entire healthcare delivery. In USA, nearly 70% of all elective surgeries are done in day or short stay format. 'Stand alone' Ambulatory Surgery Centers have become the most attractive method for doctors, patients, insurance providers and others concerned. Ambulatory Surgery involves all branches of surgery, where the patient after surgery is ready for discharge by the evening or next day. With improvement in surgical techniques, fast tracking of surgery, good anesthesia, good equipments and efficient care it has become possible to do large number of surgeries in Ambulatory Surgery. The surgeons need to develop the confidence and belief in the Ambulatory Surgery concept. There is no compromise in the safety of surgery. The patients are happy, comfortable and accept early discharge and enjoy the comfort of their home and family for recovery.

Nova Medical Centers are standalone state-of-the-art ambulatory surgery facilities in the country with a pan India presence. Many Hospitals have started promoting our concept in their hospitals.

In this conference, we want to highlight the advantages of the concept and show you how success can be achieved. The conference will be of benefit and importance to all surgical specialties, anesthetists, physicians, nurses, administrators, investment management groups, finance and the support staff. The conference will give a great opportunity for knowledge sharing, social gathering and networking.

We assure you an informative and enjoyable experience.

Best wishes,

Dr. M.G. Bhat
Organizing Chairman
99002 46001

Who Should Attend

- Hospital & Nursing Home Owners
- Nurses
- Administrators
- Finance & Investment Groups
- Paramedical Groups

Doctors

- General Surgery
- Orthopaedics
- Ophthalmology
- ENT
- Gynecology
- Plastic Surgery
- Anesthesia & Pain Management
- Radiology
- Cosmetic Surgery
- Dental Surgery
- Physicians
- Urology & others

- Laparoscopic & Open Surgery Equipments & Instrument Companies
- Pharma Companies
- Diagnostics Equipments
- IT Providers for Healthcare Industry

Highlights of the Programme
